

Term 1 – Learning in York Class

Funny Faces and Fabulous Features

Communication:

This term, we will begin the year by building communication skills through both individual ABLLS learning-box tasks and daily group communication sessions. We will be working on our writing, reading and speaking and listening skills throughout these activities.

Healthy Lifestyles:

In cooking we will be focusing on tasting a variety of foods, simple food preparation and applying our fine motor skills when cooking.

We will also work on individual fine and gross motor skill targets throughout the term.

Number:

We will be working on our individual maths targets within our ABLLS learning-box sessions and group number activities. We will be using lots of games and songs to develop and practise our maths skills.

Understanding the World:

In our Funny Faces and Fabulous Features topic, York class pupils will explore themselves and others by learning about different body parts, facial features and what makes each person unique, through a range of sensory and hands-on experiences.

We will cover a range of subjects through themed learning activities, which will include; stories, songs, arts and craft, wellbeing and other interactive group activities.

Wellbeing and Sensory:

Supporting emotional wellbeing is a key focus every day in York class. We guide children to recognise and communicate their feelings through visual supports, calming sensory experiences, and opportunities to choose and use their own self-regulation tools.
